

# Who are the top 5 artist who have the highest sale?

From the chart, it is clearly seen that Iron Maiden music is sold the most which is approx. 140. After Iron Maiden it's U2, then Metallica, Led Zeppelin, Lost. After Lost the music sale of all other artist mentioned here are almost similar.

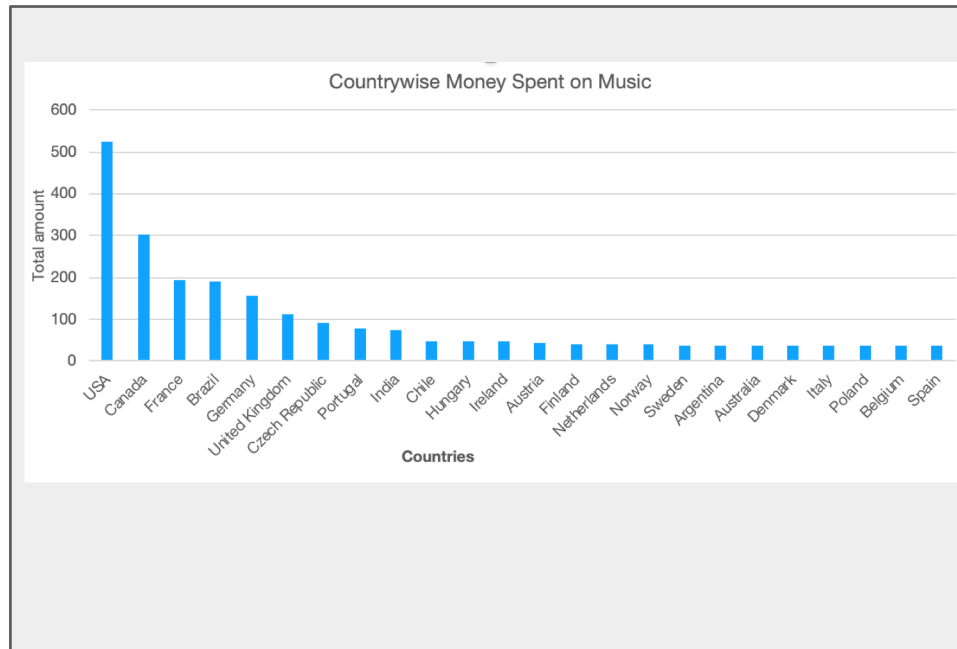

# Based on the above inference, how many albums did these top artists made?

Iron Maiden whose music was the top selling amongst all, created the most albums, however U2 who was 2<sup>nd</sup> in the top selling music artist, made lesser albums as compare to Led Zeppelin and Deep Purple who were behind U2.

Based on this it can be said that the top selling music does not merely depends of the number of albums the artist create. It depends on various other factors too.

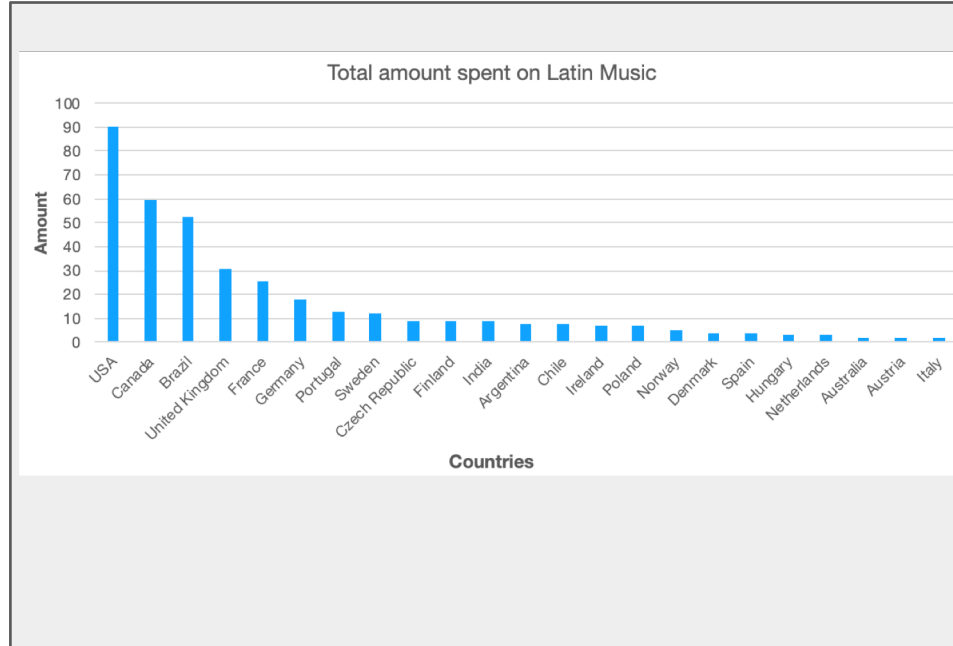

# Which country has spent the most on the music ?

Clearly people in USA, spends the most in purchasing music from the stores. Amount is more than 500. After USA, it's CANADA which is around 300, after that it goes low and low.

European people doesn't seem to buy much music from the stores.

Now, determine which country has spent the most on Latin Music?

Now, when we look at specific Latin music, it's again USA which has the highest purchase overall, even here also Canada has 2nd most highest purchase.

However, France which was 3<sup>rd</sup> in total music purchase, comes 5<sup>th</sup> in Latin Music purchase. People from Brazil seems to listen more Latin music as compared to France.
